Recommendation for Dušan Marić

> Dušan and I were Senior Software Engineers at FieldFlō on different teams, and our work overlapped from time to time. In his last two months there he worked with another lead on modernizing the architecture of the whole project, did a large share of that work, and made big advances in the project's code quality. He is friendly, approachable and always responsive, even to a work message on a Sunday evening, and his good mood is genuinely infectious. I recommend him to any engineering team.

Milos Ozegovic

Senior Software Engineer, FieldFlō · colleagues February – October 2026
